.boardmakeronline.com
.myboardmaker.com
[bmapactivityuploadstorage.blob.core.windows.net](#) 
[bmprodactivitystorage.blob.core.windows.net](#) 
[bmrubprodstor.file.core.windows.net](#) 
[bm-svc-prod-sr.service.signalr.net](#) 
[bm-services.azure-api.net](#) 
[bmrubteststor.file.core.windows.net](#) 
.goboardmaker.com
.mytobiidynavox.com
.tdlicensing.com
.tobiidynavox.com
[tdvox.web-downloads.s3.amazonaws.com](#) 
[s3-eu-central-1.amazonaws.com](#) 
[dc.services.visualstudio.com](#) 

Additionally, the machine running BM should also allow the following traffic back to the local host:

127.0.0.1:50000
127.0.0.1:50160
127.0.0.1:10417

NOTE: The list above is formatted for Squid. A leading . indicates the domain and all subdomains

[example.com](#) will add that domain

.example.com will add [example.com](#) and all subdomains.
